

## Sample 1: Wired Table Structure (Lattice Test)

This table features explicit vector line boundaries (1px solid borders) bounding every individual cell. It includes merged column headers (colspan) and complex nested fields to test geometric lattice cell splitting algorithms.

| Region Code | Territory Name                  | Q1 - 2026 Fiscal Performance Metrics |                      |                |
|-------------|---------------------------------|--------------------------------------|----------------------|----------------|
|             |                                 | Gross Sales (\$M)                    | Operating Cost (\$M) | Net Margin (%) |
| REG-0192    | North America (East)            | 142.50                               | 88.20                | 38.1%          |
| REG-0481    | Western Europe (APAC Corporate) | 98.15                                | 61.40                | 37.4%          |
| REG-0994    | Asia Pacific (South)            | 215.80                               | 112.95               | 47.7%          |
| REG-1102    | Latin America (Mercosur)        | 64.20                                | 49.10                | 23.5%          |

## Sample 2: Wireless Table Structure (Stream / Whitespace Test)

This table contains no vertical or internal horizontal grid lines. Extraction tools must rely purely on the coordinate alignment of character tokens (whitespace gaps) to reconstruct column boundaries.

| Item ID | Product Classification Description             | Units Sold | Unit Price | Total Revenue |
|---------|------------------------------------------------|------------|------------|---------------|
| PRD-X91 | Enterprise Cloud Compute Node (Tier 4)         | 1,240      | 450.00     | 558,000.00    |
| PRD-M42 | Managed Kubernetes Cluster Orchestration Suite | 45         | 2,100.00   | 94,500.00     |
| PRD-S12 | Serverless Database Storage Volume (per TB)    | 8,912      | 12.50      | 111,400.00    |
| Total   | Aggregate System Output Summary                | 10,197     | —          | 763,900.00    |
